2-YEAR BLACK RASPBERRY
Disease Free — Twice State Inspected

MOST ITEMS ARE POSTPAID TO YOU

To save you additional money, we pay postage on most items. You will find these items so listed in our 1953 Catalogue. However, some items listed are too large to send by parcel post, such as large fruit trees, shade trees, and blooming size shrubs.

Also there are a few ornamentals and hedging, and some berry plants that we list at such low prices for the high quality of stock that it is impossible for us to pay the transportation charges. We send these transportation charges collect.

Some orders include large size trees, that have to be sent express collect, and also some items that would ordinarily go postpaid. In order to avoid making 2 shipments, so that your stock will reach you at one time, we ship the whole order express; for this privilege we will include extra stock, our selection, to fit in with the items on your order, that have a greater value than the transportation charge.

Sims Guarantee To You

We GUARANTEE everything to reach you in perfect growing condition. If for any reason this stock is damaged or does not come up to your expectations or if there has been a mistake in your order, if you will notify us within 5 days, we will replace damaged items FREE.

Each year we spend many thousands of dollars giving our nursery stock the very best of care, with the most modern methods. Therefore we are reasonably sure our stock will grow and live. However, occasionally the very best of stock fails to grow, because of local soil, weather and care conditions, which are beyond our control.

We want each of our customers to be more than satisfied. Therefore, if you have a loss of stock and will notify us before July 1st, we will replace the following year at one-half price.

Sims further GUARANTEES everything to be true to name, as described in this catalogue. If found to be otherwise, we will replace free on due proof of untruthfulness. We will not hold ourselves liable for any amount greater than the original amount of purchase price.

Let Us Add You to Our Family of Satisfied Customers

We Have Them In Every State in The Union

10 REASONS we know why you will be pleased with our stock.

1. FRESH STOCK FROM SIMS

We are not dealers, we grow and propagate all the trees and plants we sell, thereby giving you fresher stock in better condition.

2. THREE GENERATIONS

For three generations we have been growing and fruiting thousands of plants. We pass this knowledge gained on to you in our healthy, well rooted stock.

3. ORCHARD TESTED VARIETIES

We maintain test orchards, so as to test each new variety as it is introduced. We offer for sale to you, those that have proved outstanding.

4. PERSONAL SERVICE

Our business has been built on high standards, and we aim to give personal attention to every customer. If you have any personal problems, write us, and we will be glad to help you.

5. MODERN EQUIPMENT

Here in our nursery we use the most modern spraying, cultivating and digging equipment, which enables us to give you better stock at lower prices.

6. BETTER, LONGER LIVED TREES

We all know that nothing is stronger than its foundation, and the foundation of all fruit trees is its root system. Therefore we use only the strongest and best seedlings for our root stock.

7. TRUE TO NAME

All our stock is guaranteed True to Name as we hand select our scion wood from our bearing orchards. Enabling us to give you selected strains of all varieties.

8. HONEST GRADES

All our trees and shrubs are graded according to the Standards of the American Association of Nurserymen. Therefore you are assured of honest grades.

9. PACKED RIGHT AND SHIPPED RIGHT AT PROPER TIME

All orders are packed by experienced help, to reach you in the very best growing condition, and shipped to you at the proper planting time for your locality.

10. REPEAT CUSTOMERS

We get repeat orders year after year from our old customers, and also their neighbors. LET US INCLUDE YOU ON OUR LIST OF SATISFIED CUSTOMERS.

TO HELP YOU

FREE PLANTING GUIDE

We send you FREE, a planting guide with every nursery order. It tells you in a simple, easy-to-understand way how to plant, even if you have had no experience, so by following these simple directions, you will be insured success with all your planting. It gives the following instruction:

General care: Pruning; Watering; Fertilizing, etc.

SIMS APPLE TREES

WEALTHY

A big red-striped Apple. Has been a favorite for years, and is classed with the best summer Apples. Extra good shipping and keeping qualities. Its hardiness of tree and ability to stand cold climates, and young bearing habits, make it accepted in North as well as South.

MAMMOTH MAIDEN BLUSH

An old favorite that still holds its own among commercial orchard men. Although it was introduced many years ago, it is one variety that has been studied and tested. Many varieties have been tried and discarded. But Maiden Blush is still a leader. Maiden Blush is golden yellow with a red blush. It ripens in mid-summer and cannot be beat for pies, sauce or canning.

The strain of Maiden Blush we now offer is selected from an old Maiden Blush orchard. The founder, John W. Sims, planted it many years ago, and it is much larger than the common Maiden Blush.

RED BIRD

Extra early summer Apple; flaming red; very hardy. Its appearance and high quality make it demand a high market price on any market. Bears heavy annual crops.

BOUGH SWEET

Large, pale yellow, very sweet and good to eat out of hand, also fine for preserves. Holds its shape after cooking. Tree strong grower and good bearer. Ripens in August.

WOLF RIVER

An old variety of exceptional cooking qualities. Very large, somewhat flat in shape, greenish yellow with a bright red blush. Trees bear very young; heavy annual crops. Wolf River's large size makes it sell well on the market.

YELLOW TRANSPARENT

The Famous Early Apple

The leading early cooking Apple of the nation. Accepted by growers and housewives alike to be the yardstick by which all early Apples are judged. Tree is an upright grower; very hardy, young bearer. Fruit medium to large with sub-acid flavor.

DOUBLE RED DELICIOUS

The Answer to Apple Growers' Dreams

The Double Red Delicious was introduced several years ago, and has gained more popularity each year since it was introduced. It has the same high quality and flavor as the regular Red Delicious, but colors several weeks earlier, thereby enables the grower to pick when fruit is firm, and market is at its best. Be sure to enclose an order for Double Red Delicious in your planting this season.

YELLOW DELICIOUS

The best and most popular of all yellow Apples. Golden in color, quality, and value. One of the best for pies, sauce, or eating fresh. It is tops as a commercial Apple because of its good storing qualities, and being readily accepted on all markets. It excels all varieties in young bearing and heavy annual production.

**Yellow
Delicious**

ANOKA — The Old Folks' Apple

Usually bears a light crop the following year after planting. The second year you will get a full-sized crop of fine Apples. It is one of the earliest varieties grown. Fruit is large, well-colored and of excellent flavor.

CHAMPION (Summer)

This is truly a champion of quality, cooking, eating, shipping and storing. Large size greenish yellow with red blush. Bears large crops each year. Always tops the market.

**Red
Rome
Beauty**

Orchard Tested

AND PROFIT**

LODI

New Large Transparent

A new hybrid Transparent was recently released by the New York Fruit Testers Association. Lodi in our orchard has proven to be one of our best early Apples both from the standpoint of young bearing and high quality. Readily accepted on all markets to be a superior early Apple. One of its qualities is its ability to stand handling and shipping without bruising, because of its firm flesh and tough skin. Plant Lodi for home use, roadside markets, or long distance shipment.

SIMS DOUBLE RED JONATHAN KING OF ALL RED APPLES

A sport of the Famous Red Jonathan Apple. The same juicy, spicy high quality flavor as the regular Jonathan, but attains a deep red color at least 2 weeks earlier in the season. The high color making them very desirable for either home or commercial planting. Trees bear young and are very productive and long lived.

Double
Red
Jonathan

SIMS SCARLET STAYMAN WINESAP

The Apple with the flavor boost, a scarlet-red sport of the very popular Stayman Winesap Apple, which has gained favor with orchardists throughout the country, because of its bright, scarlet color attained several weeks earlier than regular Stayman. The fruit has an even more pronounced, spicy, juicy flavor than the regular Stayman. Many leading fruit growers report from every section of the country, Red Stayman to be outstanding in color, tree vigor, size of fruit and heavy bearer.

BLACK BEN DAVIS

Sims Scarlet Red strain attains an all-over red color earlier than regular Black Ben, with fruit as large or even larger. Trees produce heavy annual crops. It is classed with the best of all winter keepers, and is accepted on all markets.

RED ROME BEAUTY

A clear, bright all red Apple, with a tough, smooth skin, which makes less bruising and also one of the best winter keepers. Its snowy white, fine grained flesh makes Red Rome very desirable for eating fresh or cooking. Trees are very young vigorous growers, producing heavy annual crops.

WILLOW TWIG RED

(New Improved Strain)

A new selected sport of Willow Twig of a larger size, very uniform and symmetrical, and unexcelled in color. Keeps in storage until May without scalding or breaking down.

Guaranteed true-to-name, propagated right, grown right, packed right. Guaranteed to reach you in the best condition to start growth.

CRAB APPLES

HYSLOP CRAB

The best late fruiting Crab for pickles, preserves and jelly. Lovely pink ornamental blooms.

VIRGINIA CRAB

A fine quality small red Crab Apple. Ripens mid-season. One of the very hardiest Apples often used as under stock because of its unusual hardness.

HIBERNAL

Fruit of very ordinary quality, one of the hardiest, thriftiest growers, because of its Siberian origin. Recommended for under stock in top-working weaker varieties. If you have had trouble with short lived trees due to winter injury, collar rot, sun scald, etc., try Hibernial or Virginia Crab. You will be well paid for your extra work, because of younger bearing, longer lived trees.

Twig
Red

SIMS SELECTED PEAR TREES

Tested Varieties, Easy to Grow

LINCOLN — Highest Quality, Blight Free

Lincoln is recognized everywhere to be one of the best flavored, easy to grow, hardiest Pears. It is almost free from blight. Bears very young. Tremendous crops of golden yellow fruit when full ripe. Compares in flavor and quality to Bartlett. Readily accepted on all markets as a canning and desert Pear. Ripens in mid-August.

Kieffer

KIEFFER

Hardest and Best Keeper of All

Of all the Pears, Kieffer is a leader, because of its hardness and its ability to adapt itself to a wide range of soil and climatic conditions; from the southernmost states to Canada, Kieffer is a leader.

Kieffer rates tops in keeping quality. No other Pear can compare with Kieffer when stored in common or cold storage. The fruit is very large in size, golden yellow with a slight red cheek, very juicy. You won't go wrong planting Kieffer.

SECKEL — The Honey Pear

The little Sugar Pear everyone knows. Borne in clusters every year. Delicious honey-sweet melting flavor, wonderful for fresh use. They are also very good for pickles or preserves. Tree hardy, semi-dwarf, bountiful annual bearers.

Lincoln

Bartlett

BARTLETT

The Delicious Eating Pear

One of the very best canning, eating and marketing Pears. Sweet, tender, juicy flesh with an aroma and flavor equalled by none. Bartlett will sell on any market, even when the other varieties are not in demand.

Tree is a fast, upright grower, bears young and abundantly. Does best on fertile soil, under best cultivated conditions; one or two Bartlett trees will furnish plenty of fresh fruit for the family and surplus for canning and preserving.

Stanley
Prune

SIMS PLUM TREES

Plant More Plum Trees For Future Profits

**We Offer Those of Recent Introduction,
And Improved Strains of Popular Varieties**

STANLEY PRUNE

Extra Young Bearing

Sweet golden flesh, freestone, beautiful purple-black skin, overlaid with rich bloom. Ripens 10 days ahead of most other Prunes. Firm, does not crack, excellent quality for local or distant markets. Can be counted on to produce heavy crops every year. We recommend Stanley and President as a combination in commercial plantings. Stanley is one of New York Experiment Station's prize Plums.

SAPA — Hardy Hybrid Plum

A hardy Plum of northern origin that does equally as well in all parts of the country. Often sold in the North as Cherry Plum. Medium maroon-red fruit, colored all the way through, size will average somewhat larger than the Damsons. This fruit always sells well because of its high quality, pronounced Plum flavor, which puts it at the top of the list for canning, pies, jellies and sauce.

ABUNDANCE — Delicious Table Plum

Hardy Japanese variety free from black rot. Early ripening, large pinkish red with yellow flesh. Very sweet and unusually delicious flavor. Adapts itself to a wide range of soil and climatic conditions.

UNDERWOOD — The Aristocrat of the Plum Orchard

The fruit is heart-shaped, very large, firm flesh, can be shipped to distant markets. Always demands high market price in its season. Never fails to bear full annual crop regardless of extreme winter temperatures or late spring frosts. Underwood is a late introduction, and has gained wide popularity both as a home orchard and a commercial variety. Tree is a very vigorous grower with healthy disease-resistant foliage that is often lacking in some of the better quality Plums.

GREEN GAGE — Yields - Quality - Flavor

Extra large, roundish shape; golden yellow when full ripe; freestone. Has a sweet, tart flavor all of its own. The strain of Green Gage we propagate we believe to be far superior to any other, because of extra size, and being a perfect freestone. Tree is very vigorous, being semi-dwarf. Blossoms are self-unfruitful and should be set with other Plums to secure highest yields.

and
Bear Young

SIMS PEACH

J. H. Hale

HALE-HAVEN — Sims Original Strain

A magnificent cross between the wonderful quality of J. H. Hale and the hardiness of South Haven. Wonderful size and color, and shipping qualities; hardy in bud and a vigorous tree. A profit making variety you cannot afford to overlook. Ripens August 1st.

BELLE OF GEORGIA Best White Freestone

The Queen of flavors. Best white midseason freestone. Color creamy white with a bright red cheek. Ripens a day or two before Elberta. There are very few commercial orchards that do not have a good sized block of "Belles" in them, even though they do not grow any other white Peaches. Experience has shown them to be of high quality and a money maker. In demand on all markets because it is no doubt the firmest, best quality white Peach of its season. Like most white Peaches, Belle of Georgia is hardy in the bud. Will stand colder temperatures than other varieties and are self-pollinizers. Be sure to include Belle of Georgia whether your orchard is home or commercial.

Belle of
Georgia

NEW FAIRHAVEN

The new Fairhaven Peach is a cross between J. H. Hale and South Haven, so can't help but be a winner. It has earliness, great fruitfulness, hardiness, flavor, shipping quality, beauty of form, and wonderful color. It ripens about one week before Hale-Haven.

Fruit, larger than Hale-Haven or Redhaven, even when heavily loaded. Shape, nearly round. Color, bright golden with attractive bright red cheek. Skin smooth and very tough. Ships exceedingly well.

J. H. HALE

One of the big selling Peaches which never loses its popularity. Richly flavored, fine textured golden yellow flesh. Skin is bright yellow, deeply blushed with red, and nearly fuzzless. Extra large, round, uniform in size. Always sells at top price for fancy eating and canning. Ripens with Elberta. Hardy as Elberta and is freestone. Semi-fertile—plant a good pollinizer every third row.

THE FAMOUS ELBERTA

Sims Improved Strain

The Peach that sets the standard by which all varieties are judged. It still reigns supreme with housewives, shippers, and retailers. A large size freestone, rich yellow blushed with red. Rich flavored. Extra firm with fine texture. No doubt the leading shipping, canning, storing, drying and freezing Peach. Elberta is a self-pollenizing variety and a good pollenizer for other varieties. Ripens about the middle of August. Trees are vigorous growers and usually bear the second or third year with enormous crops at maturity.

Note: We have one of the best strains available anywhere at any price.

SULLIVAN ELBERTA

An early ripening red bud sport of genuine Elberta. Ripens about 10 days earlier. Identical to genuine Elberta in every respect except it ripens 10 days earlier. Large yellow freestone, firm, juicy, rich good flavor and just as attractive as Elberta and as good a shipper. Limited supply. Order early.

MAMMOTH WHITE HEATH CLING

Best Strain of the Well Known White Cling

Fruit tender, melting, juicy, luscious, firm. Does not bruise easily. Tree is strong, vigorous grower. Like most white Peaches it is hardy and buds will stand lower winter temperatures. Ripens about forty days after Elberta. A wonderful Peach for canning, pickles and preserves. A few should be planted in all home and commercial orchards. Fine for local market and roadside stands.

NEW TRIOGEM

Another good early yellow, large freestone, recently introduced by the New Jersey Experimental Station. Yellow overlaid with deep red. Solid, good shipper. We have tested this variety and have found it one of the best. Always brings top prices on the market, because it ripens a few days earlier than Hale-Haven. Limited supply. Order early.

GOLDEN JUBILEE — What a Peach

Golden Jubilee has everything hoped for, for so long. Commercial Peach orchardists for a century have been looking for an early Peach of high quality, fine flavor, firm texture, yellow freestone.

DIXIRED

Medium size, yellow clingstone. Flesh firm but melting; good flavor. Acquires its attractive red blush long before it is ready to pick. Promising early shipper.

Early
Elberta

EARLY ELBERTA

Our Own Bud Selected Strain

Most attractive Peach. This strain of Early Elberta has a more pronounced red blush and a trifle larger oval-shaped fruit than any other Early Elberta we have seen. Solid flesh, honey-sweet. A large yellow freestone with a bright red blush. A vigorous grower bearing young and tremendous crops. Self-pollenizing. Ripens first part of August—five to seven days before Elberta. Some of this fine strain should be included in every commercial or home planting.

SNYDER ELBERTA

The new light yellow Elberta that made Southeast Missouri famous. Ripens just before Elberta. Light yellow with red blush, wonderful flavor, even firmer and better shipper than Elberta. Limited supply. Order early.

REDHAVEN

*Earliest, Dazzling, All-Red, Self-Pollenizing
Peach—Quality Unsurpassed*

Redhaven matures very early, about a month before Elberta. Fruit medium in size, of slightly elongated shape, and almost completely covered with a brilliant red color. Skin is smooth and tough. Flesh yellow, firm, fine textured, sweet, and of good quality. A perfectly fertile variety and freestone. It is safe to classify Redhaven as the outstanding early Peach of tomorrow. Be the first in your locality to possess this rare and most profitable variety.

Red-
haven

SIMS HARDY NUT TREES

*Serve a Dual Purpose
Fruit and Shade*

Thomas Black Walnut

THOMAS BLACK WALNUT

Improved, grafted Black Walnut which is giant size and kernels come out in halves. Thomas is a fast grower and produces the largest nuts. It bears very young, usually next year after planting. A mature tree will produce 15 to 40 bushels. The thin shell nuts of an immense size crack easily, meats are of delicious flavor and tree will grow anywhere.

	Each	2
3 to 4 ft.	\$2.50	\$4.80

STUART PECAN — (Paper Shell)

Hardest of the paper shell variety. Comes nearer to being well adapted to all sections of the country than any other. Nut is large, long, thin shelled, of excellent quality. Tree is very ornamental and of rapid growth. A profitable variety for commercial planting.

	Each	2
3 to 4 ft.	\$2.65	\$5.00

HAZELNUT — (American Filbert)

Small tree, bushes grow in shrub form, with wide leaves which color bronze in autumn. Will thrive in any well-drained soil. Plant as a shrub in the border or garden. Produces round kernels, tender and sweet, very nutritious. Shells are soft and can be easily removed.

	Each	5
2-3 ft. ..	\$1.25	\$4.95

CHINESE CHESTNUT

New Chinese Chestnut proven blight resistant.

Wonderful new strain, hardy, prolific bearer, fine flavored sweet nuts. Larger than the American variety. Trees grow to about the size of an Apple tree. Long lived, start bearing second year after planting.

	Each	2
2-3 ft.	\$1.85	\$3.40

SIMS GRAPE VINES

Better Bearing Crops of Better Fruit

In planting Grapes you make an investment that will last a lifetime. Our plants are all heavy rooted disease free stock.

NEW FREDONIA

Large early Concord type Grape. An introduction of the New York Experimental Station. A strong healthy grower. Have large full clusters of firm berries, Fine shipper. Does not weather-crack in vineyard.

NIAGARA

White mid-season; best of the white varieties. Bunches of large white-greenish berries changing to pale yellow when ripe; a heavy grower and sure cropper. Very popular with commercial growers and home gardeners.

CONCORD

Most popular and widely planted variety; will adapt itself to almost any climatic or growing conditions. Large compact bunches, purplish black with a rich bloom; skin is tender but sufficiently firm to carry to distant markets. The old favorite for juice, wines, and jellies.

MOORE'S EARLY

Ripens 10 days before Concord; fancy black-purple table Grape resembling Concord in appearance but of finer quality; not quite as thrifty a grower as Concord.

CACO - RED

Beautiful large bunches crowded with big, juicy, amber-colored fruit of a very delicious sweet flavor. Rapid, strong grower, bearing young and heavily. Hardy red Grape; ripens before Concord.

Orchard Proven

We are offering only those varieties we know to be heavy producers, and money makers.

LARGE IMPROVED MONTMORENCY

Ripens late June. Trees bear young, often two years after planting. Fruit bright clear red with sweet acid flavor, a very popular commercial variety, fine for market, home canning and preserving.

EARLY RICHMOND — A Larger Strain

Ripens early in June. Earliest of sour Cherries. Medium dark red in color; sub-acid, juicy flavor, excellent for early canning; and a dependable cropper. All our Early Richmond trees are propagated from a parent tree of exceptional quality.

ROYAL DUKE

Large, bright red, even larger than our Large Montmorency. Sure cropper, excellent quality for home or market, one of the best. Be sure to include one with your order.

WOEHRMAN RED GIANT — The Superior Sweet Cherry

Large, dark bright red, honey-sweet, fruit ripens mid-season. Bears heavy annual crops, on vigorous upright growing tree. This Cherry is sold exclusively by SIMS, and is accepted by all as a superior sweet Cherry. Blossoms are self unfruitful and trees should be set with Tartarian and Golden Sweet as pollenizers. Add 25c more per tree for Woehrmann Red Giant.

SIMS GOLDEN SWEET

A selected strain of yellow sweet Cherry, mellow honey-sweet flavor. Delicious for canning and preserving.

BLACK TARTARIAN

Best Commercial Sweet

Beautiful, lustrous black fruit, when ripe. Matures to large delicious firm fruit that ripens early in the season. Trees are hardy and bear young and heavily. A leading shipping and canning Cherry. Excellent pollenizer for other varieties.

SIMS APRICOT TREES

For Heavy Production

SIMS NEW VICTORIA GIANT — Quality, Flavor, Productiveness

Our own new introduction. Very hardy. Late bloomer, escapes the late spring frosts. Bears heavy crops when only two or three years old. Large as small oranges, deep yellow blush, with red color; freestone. In all our years of fruit growing we have never seen any Apricot with as fine a quality. Be sure to include one or two trees with your order. Victoria will surpass your wildest dreams of Apricot perfection.

SUPER APRICOT — Popular Everywhere

Fruit beautiful, light salmon color, very good quality. Trees are large, very thrifty, hardy and extremely productive. Rated by most commercial growers as the best, most widely planted variety. Because of their firm, solid fruit, which makes them ideal for shipping, and because of excellent flavor, they are accepted readily on all markets.

New Victoria Giant

Sims Outstanding **RED RASPBERRIES**

THRIFTY GROWERS AND INCREASED PROFITS

↘ **INDIAN SUMMER** — *Two Crops in One Year*

The giant everbearing Red Raspberry. Indian Summer bears a full crop in June and another in fall. The berries are long, deep, large and red—small cavity. Very rich in flavor. Plants grow tall, are hardy and thrifty. In production they will equal the best. Firm enough for shipping.

↘ **LATHAM**

Large Size and Heavy Yield

The most profitable Red Raspberry. Thrifty, healthy, hardy, easy to grow. A money maker if grown commercially or as a tasty treat in home garden. Often yields as high as 500 crates to an acre.

↘ **SUNRISE**

Extra Early, Extra Quality, Extra Profits

The extra early Red Raspberry. Here in North Missouri ripens earlier than any other Raspberry—about two weeks before Latham—which always insures the highest market price. U. S. Department of Agriculture says of Sunrise: "Of most importance from the standpoint of the practical grower, perhaps are the hardiness and resistance to disease of the plants, the earliness and large size of berry." Top the market with Sunrise.

SIMS PURPLE RASPBERRIES

The New Hybrid Raspberry

↘ SODUS is a cross with the Black and Red Raspberry. New Purple Raspberry introduced recently by the New York Experimental Station. Hardier and thriftier grower than either Black or Red Raspberries, and the fruit surpasses either in flavor. Perhaps the largest Raspberry grown. Often twice or three times as large as Blackcaps. Extra heavy bearer with long picking season. Never shows winter injury in the most severe winters. The color is a deep reddish purple with a rich bloom.

New Bristol

BRISTOL BLACKCAP

This new variety is rapidly growing in popularity as the best midseason Blackcap, both for home and commercial planting. A vigorous grower that produces tremendous crops. The berries are large, jet-black, firm, sweet, almost seedless and of unsurpassed flavor. A hardy, healthy grower, does well over a very wide territory, doing well even in sections of the south like Oklahoma.

Sims BLACK RASPBERRIES

One of the Most Popular Small Fruits

Plant Them for Increased Production

→ CUMBERLAND — The Universal Favorite

Most popular Blackcaps. Its record has come down through the years, and it is recognized everywhere as the best and one of the most profitable Blackcaps. Endorsed and grown as the leader everywhere. The plants are healthy, vigorous growers, throwing out stout, well branched canes that produce immense crops of beautiful, glossy fruit. The fruit is large and firm, and will carry to distant markets in good condition. Rated as one of the most delicious Blackcaps. Midseason.

DISEASE FREE

All our Raspberries have been twice state inspected for disease. For increased production, plant only disease-free plants.

NEW MORRISON

Mammoth Midseason Blackcap

A lustrous black color. This black beauty is king of all mid-season Blackcaps. This variety originated in Ohio and the original planting, which is 15 years old, is disease-free and still produces heavy annual crops. Morrison has everything ever hoped for in a Black Raspberry: large size, firm, solid fruit, thrifty grower, disease resistant canes, and fruit so attractive that these berries sell on sight. You will make no mistake in setting Morrison whether for home or market.

SIMS STRAWBERRIES

Selected High Yielding Varieties for Home or Market

PREMIER — A Sure Money Maker Leading Most Popular Early Strawberry

The most valuable, widely planted, early Strawberry; very frost resistant; healthy, strong grower; thrives on many different soils; holds all records for heavy production and big profits. Firm enough for truck shipments and local markets. Our leading variety.

NEW GIANT ROBINSON The Modern Main Crop Berry

The Robinson originated in the heart of the Strawberry growing section of Michigan, and is rapidly growing in popularity throughout the country. Robinson always brings a premium on the market due to its extra large size, scarlet-red color and unusual firmness. The fruit has a delicious, sweet, real Strawberry flavor. It ripens in midseason. Is a vigorous grower, always making a good fruiting row.

PREMIER AND ROBINSON PRICES 1-Yr., Heavy Fibrous-Rooted Plants

25	50	100	500	1000	2000
\$1.30	\$2.20	\$3.10	\$9.50	\$16.00	\$31.00

BELLMAR

(Early)

This is another of the newer varieties. One of the surest indications of popularity is the increasing demand each year for plants of Bellmar. Bellmar in growth resembles the Premier with the exception that it will make more plants than the Premier. The extra large berries are very attractive, have a dark red color that extends clear through to the center of the berry. The fruit stands up well in shipping.

25	50	100	500	1000	2000
\$1.20	\$2.10	\$3.00	\$9.30	\$15.90	\$31.00

FAIRLAND

Fairland (USDA 3205) just recently released for introduction by U. S. Department of Agriculture, is outstanding in so many fine respects, its paramount feature being **disease resistance**. Healthy, vigorous grower. Heavy dark green foliage protects the flowers borne on short stalks making it **frost resistant, too**. Equals Premier in productivity. Medium large, bright red berries have a glossy finish. Ripen uniformly—a few days earlier than Premier, and are somewhat firmer. Flavor slightly tart. One of the finest for fresh freezing.

25	50	100	500	1000	2000
\$1.40	\$2.30	\$3.20	\$9.60	\$16.25	\$31.50

BLAKEMORE — The Ideal Commercial Variety

Most widely planted berry in the U.S.A. A cross between Premier and Missionary. Berries of medium to large size, bright red with extra good flavor. Its firmness and long keeping qualities make it very popular for shipment to distant market; thrifty grower, always makes a heavy fruiting row.

SENATOR DUNLAP — The Old Standby Variety

The best flavored Strawberry of them all. The old home garden standby; can be grown successfully with a minimum of care. It is a favorite with housewives because of its superb sweet flavor and canning qualities.

BLAKEMORE AND SENATOR DUNLAP PRICES Thrifty Healthy Plants

25	50	100	500	1000	2000
\$1.10	\$1.60	\$2.90	\$7.80	\$13.00	\$25.00

\$1.95	\$3.25	\$5.25	\$11.50	\$21.00	\$35.00

NEW ARMORE

Most recent introduction by University of Missouri, Blakemore X Aroma cross. Large size, firm fruit, which is dark red all the way through. Even though it is an extra large Strawberry, it does not have a core or cavity in the center. Holds up extra well in shipping. All the flowers will mature fruit, and will hold size well until end of season. Ripens 10 days later than Premier. All reports from growers are very enthusiastic. We believe this berry will become a great commercial variety.

EVERBEARING STRAWBERRIES

The Best, Latest Introductions

NEW STREAMLINER

The Sensational Everbearer

A new everbearer that has everything! Enormous size, beautiful coloring, good flavor, excellent shipping qualities and a good producer. It is claimed to be the largest berry of all the everbearers. Berries are almost round, glistening scarlet color and are sweet as honey—full Strawberry flavor. No green tips, for it ripens into a beautiful, rich red all at one time. Its firm qualities make them an excellent shipper. A wonderful variety for canning, and excellent for freezing. Bears 60 to 90 days after planting, and a fine crop the following June. A sturdy plant with luxurious green foliage. Order early, as our supply is very limited.

SIMS HARDY CLIMBING ROSES

BLAZE

An ideal pillar Rose with clusters of brilliant scarlet flowers covering the plant in June and repeat intermittently all season. Holds this bright color in the hottest sun. Plant in good soil as the more it grows, the more it blooms. If you cut off the old flowers, new bloom shoots will grow from the first eye below the old flower cluster.

PAUL'S SCARLET

Large, vivid scarlet-red, semi-double flowers freely produced in clusters on much-branched canes. It is a strong grower and very hardy; healthy foliage. The very best in climbing Roses.

CLIMBING AMERICAN BEAUTY

An old favorite Climbing Rose. Very hardy and a vigorous grower. Very deep pink and free blooming.

CLIMBING TALISMAN (Everblooming)

Fragrant rich orange-yellow buds opening into large blooms of salmon-orange, shaded with red and gold.

LUXEMBOURG CLIMBER

Deep golden yellow double blossoms. Sweetly fragrant. Vigorous. Gives more blooms than most yellow Roses.

CLIMBING ROSE PRICES

Each \$1.25; 4 for \$4.25, postpaid

SIMS BABY ROSES FLORIBUNDAS and POLYANTHAS

These baby Roses are fine for solid beds or borders, ideal for cemetery planting because they bloom freely, and are easy to grow, continue to bloom from early spring until freezing. Very hardy, grow anywhere and require very little care.

BABY IDEAL

Velvety crimson-red; a profusion of dainty, fragrant clusters from early June until frost. Low growing habit makes it ideal for edging and borders.

GOLDEN SALMON

Blooms continually. Color bright orange; borne in clusters. Healthy, deep green foliage. Blossoms do not sunburn or fade.

GOLDILOCKS

This is something different—a true Floribunda in a rich shade of golden yellow. The low compact 18-inch bush is continuously bursting with golden masses of perfect little buds and many-petaled, long lasting flowers. The aging flowers hold their color and the delightful abundance of bloom is a breath-taking sight in a garden. Plant Pat. No. 672.

Each \$1.50; 3 for \$3.90

ORTHO BRAND ROSE DUST

Protect Your Roses With
Ortho Rose Dust

You will be simply amazed and delighted with the way Ortho Rose Dust kills Rose pests, such as Aphids, Thrips, Earwigs, Red Spider Mites, Japanese Beetles and many others.

Its active ingredient, Lindane, is quickly toxic to a wide range of troublesome insects—and Lindane packs a wallop that lasts for several days.

Easy to apply . . . Ortho Rose Dust is available in handy 8-ounce "Puffer Duster," or in bulk packages for use in the "easy action" all metal P-1 Duster.

FLORADORA

(Floribunda Rose). Sparkling coral-orange-red. Prolific and continuous bloomer, with best bloom in early June and late fall. Bush 2½ to 3 ft. tall.

ELSE POULSEN

Great clusters of apple-blossom-pink flowers. Ideal as a hedge, border, or a solid bed. Always in bloom.

Floradora

Goldilocks

Sims Hardy Decorative Evergreens

For Year Round Beauty

ALL EVERGREENS BALLED AND BURLAPPED, THEN SHIPPED VIA
RAILROAD EXPRESS COLLECT OR TRUCK FREIGHT.

PYRAMIDAL ARBOR-VITAE

This formal, compact pyramid is densely covered with lacy, bright green foliage. This deep green evergreen seldom measures over 2 to 3 feet in diameter at the base. Has a matured height of 12 to 15 feet. Can be clipped to any desired height. Hardy everywhere, except in dense shade.

Each \$5.75
3 to 3½ ft.

CHINESE ARBOR-VITAE

This Oriental Arbor-Vitae is an introduction from China which has proven very hardy. It has a flat, fan-type leaf with a rich green color. The leaf clusters face outward edgewise. A strong, rapid grower which can be used as windbreaks or clipped to any desired shape or size.

Each \$3.00
18 to 24 in.
24 to 30 in. 3.75

IRISH JUNIPER

Dwarf growing Juniper, erect and slender, formal and columnar in form. Has dense bluish green foliage. Reaches a height of 6 to 7 feet at maturity. Never over 1½ feet in diameter. Most striking spire-like shape of all the Evergreens. This column-like Juniper is ideal for gardens, beds and formal grounds.

Each \$4.50
2½-3 ft.
3-3½ ft. 5.75

SPINY GREEK JUNIPER

Fine blue foliage. Grows medium height. Ideal for specimen or group planting with larger evergreens.

Each \$3.50
12 to 18 in.

PFITZER JUNIPER

One of the most popular type evergreens. Beautiful dark green foliage. Succeeds almost anywhere.

Each \$4.75
18 to 24 in.
24 to 30 in. 5.50
30 to 36 in. 6.50

ANDORRA JUNIPER

Low growing, spreading dwarf evergreen. Foliage silver-green in spring, turning to rich purple-bronze in fall. One of the easiest evergreens to grow.

Each \$4.25
18 to 24 in.
24 to 30 in. 5.50

JUNIPER GLAUCA HETZI

A spreading type evergreen decidedly blue, rapid in growth, stands shearing well, closely resembles the Pfitzeriana in appearance and growth habits.

Each \$4.75
18 to 24 in.

DWARF ALBERTA SPRUCE

This is one of the most unusual Evergreens. It is of extremely close pyramidal growth, thickly covered with short, close-set, twigg branches, and clothed in grass-green leaves.

It is very hardy, it prefers a shady moist location. Very good for low plantings, terraces, rock gardens, etc.

Each \$4.25
12 to 15 in.

NORWAY SPRUCE

Rapid grower. Dark green foliage, makes beautiful lawn specimen tree.

Each \$7.25
4 to 5 ft.

HICKS' YEW

(*Taxus cuspidata* Hicksi)

Another form of Yew that is very similar to the Irish Yew, but is a much faster grower. The branches ascend almost vertically, generally growing with many stems. Its rich dark glossy green makes it much more attractive than Arbor-Vitae or Junipers.

Each \$3.75
12 to 18 in.

NEW Crimson King MAPLE

(Plant Pat. No. 735)

Truly the best Red Maple grown. A great improvement over Schwedler's purple leaf Maple. In the spring the foliage is a much richer red and Crimson King carries this deep red foliage through the entire season. Very hardy and easy to grow. Reaches the height of approximately 50 feet at maturity.

Each 2
3-4 ft. \$3.50 \$6.50

Crimson King Maple

RED FLOWERING PEACH

Symbol of Spring

(Earliest to Bloom in the Spring)

As one eagerly waits for spring, Red Flowering Peach bursts forth with countless rosy blooms that appear along the numerous, wide-spreading branches; so thick are the flowers that the tree appears as a small, red cloud. It is one of the most attractive of the low-growing, flat-topped trees, attains a height of about 15 feet at maturity. Flowers appear before the tree leafs out in spring. Due to the extreme hardness of the wood, the tree is usually very late in leafing out.

Each
3 to 5 ft. \$1.65

White Clump Birch

MIMOSA

Beautiful - Distinctive

A beautiful tree with tropical like foliage. Its feathery foliage forming an umbrella shaped top, which is of a beautiful light green and in summer it is covered with a profusion of pink fluffy blossoms.

Each
4 to 5 ft., postpaid \$1.95

THUNDERCLOUD

(Purple-Leaved Plum)

We consider this new variety an improvement over the more common types, particularly as to color. The foliage is a brighter, richer purple which holds up throughout the season. Thundercloud makes a fine contrast among other trees and shrubs. Try a planting this spring.

Each
2 to 3 ft. \$1.55

WHITE CLUMP BIRCH

A rare form of the beautiful European White Birch. Growing in clumps of 2 or more trunks on one root system. The bark turns white after two or three years, and stays white winter and summer. Beautiful when interplanted with Evergreens. Grow 25 to 30 ft. tall and are perfectly hardy. 3 to 4 ft.

Each
2 Clumps \$2.00
3 Clumps 2.50

DOLGO CRAB

Here is the finest of the Crab Apples—an exceedingly lovely ornamental fruit tree that is not too large to be planted in a yard. It is a beautifully shaped tree that in the spring is covered with a cloud of pinkish blossoms, and later with brilliant flaming red fruit. The fruit jells perfectly — makes a clear, red jelly of delicate, delicious flavor. The Dolgo Crab is a strong, small tree that resists disease and grows rapidly.

Each
